

AUSTOFT® 4000 SERIES

SUGARCANE HARVESTERS

**WHERE THERE IS
ADVANCED AGRICULTURE,
THERE IS CASE IH.**

Case IH is a global leader in the state-of-the-art technology, performance and productivity in agricultural mechanization. Its product line is present in more than 160 markets on the five continents, offering advanced solutions from planting to harvesting.

The high performance provided by Case IH sugarcane harvesters results from 75 years of knowledge and experience in the sector, making it the leader in production and sales of equipment for mechanized sugarcane harvesting.

INNOVATION WITHOUT LIMITS.

A registered trademark of Case IH.

Case IH. Committed to the evolution of the global sugar and ethanol sector.

This time Case IH launches a new and improved sugarcane harvester: the new Case IH Austoft 4000 is here.

It is a compact harvester designed especially to make it possible to streamline the harvesting process in sugarcane fields that use reduced row spacings from 1.2 meters.

BETTER CUTTING QUALITY AND LONGER STOOL LIFE IN THE SUGARCANE FIELD.

The Austoft 4000 sugarcane harvester represents once again the pioneering spirit of Case IH. Working in row spacings from 1.2 meters this harvester is narrow enough to harvest one row without compacting the root zone of the adjacent cane row. It is compact, light, has excellent maneuverability and an excellent base cut resulting in reduced cane loss and increased productivity in subsequent ratoon crops. The Austoft 4000 is designed to harvest crops up to 85 tons per hectare.

MORE VERSATILITY WITH THE AUSTOFT 4000 SUGARCANE HARVESTER.

Designed for maximum performance, the Austoft 4000 demonstrates its versatility by harvesting both in sugarcane fields with reduced spacings of 1.2 meters as well as in sugarcane fields with wider row spacings up to 1.5 meters. By harvesting in all of these row spacings, the Austoft 4000 becomes a superb option for those cane growers who need or wish to start harvesting mechanically, or for big plantation areas where the Austoft 4000 can harvest short rows and or low productivity soils, freeing the bigger volume harvesters like the Austoft 9000 series, in order to harvest to their full daily harvest capacity. This represents a significant gain in machine productivity.

FIND OUT MORE ABOUT THE AUSTOFT 4000

FEEDING SYSTEM:

- 2 Crop Dividers:** lifts and separates the row of sugarcane that is being harvested from the adjacent rows.
- 3 Knockdown roller:** guides and inclines the bundle of sugarcane to be cut, facilitating the base cutting operation and feeding the machine
- 4 Feedroller (finned):** helps feed the bundle of sugarcane for base cut.
- 5 Basecutter:** cuts the sugarcane at ground level and carries the bundle of sugarcane to the buttlifter roller.
- 6 Butt lifter roller:** lifts the bundle of sugarcane cut by the basecutter and guides it into the machine to the feed rollers.

TOPPING SYSTEM:

- 1 Topper:** cuts off the sugarcane's tops and leaf and spreads them out on the field in a uniform fashion.

FEEDING SYSTEM:

- 7 Feed Rollers:** transports and horizontally feeds the cane stalks to the chopper drums.

ANTIVORTEX CLEANING SYSTEM:

- 9 Extractor:** cleans the billets, removes the trash and other impurities

CHOPPING SYSTEM:

- 8 Chopper Drums:** cuts the sugarcane and sends the billets to the extractor chamber.

UNLOADING SYSTEM:

- 10 Elevator Table:** slews the elevator for unloading to either side.
- 11 Elevator Bowl:** receives the sugarcane billets coming out of the chopper and feeds the elevator chain.
- 12 Elevator:** carries the billets by a chain and flights for unloading. It has a perforated floor to allow dirt and impurities to be removed. Optional bolt in extension 750 mm.
- 13 Bin Flap:** directs and improves the distribution of the billets being loaded into the infield transport, increasing load density.

FLEXIBILITY, RELIABILITY AND COMFORT.

EXCELLENT COST-BENEFIT

The Austoft 4000 is smaller in size compared to the conventional models, and is easy to move between cane fields. The Austoft 4000 was designed with the same functional concept as the A7000 Series harvesters. Because of this, many of its parts are interchangeable with other models of Case IH sugarcane harvesters. This characteristic significantly increases the machine's cost-benefit.

EASY & FAST TO SERVICE

The Austoft 4000 was designed to make maintenance simple. The engine, hydraulic system, and industrial components are easily accessible, streamlining the machine preventive maintenance, increasing the machine's availability.

COMFORT FOR THE OPERATOR

For greater productivity, the Austoft 4000 has operator comfort, good visibility, and operational ease for the operator. The controls are ergonomically positioned to ensure convenience and functionality for the operator during the long working hours.

WORLDWIDE, AN ADVANCED SYSTEM FOR ENSURING HIGH PERFORMANCE OF THE AGRIBUSINESS.

NEW FEATURES

Find out more about the Austoft 4000

- 1** Larger radiator, higher cooling capacity, longer lifespan
- 2** Added USB charging port for operator convenience and improved communication
- 3** Windscreen protector preventing damage from the cane
- 4** Elevator cane flap to reduce spillage
- 5** Larger rear wheels, improved stability, reduced compaction
- 6** eView™ operating rear cameras. Located on the sides of the cab roof for monitoring the elevator and can be easily monitored from a screen in the cab

All over the world, agribusiness professionals can count on Case IH for technological innovations, advanced solutions and professional technical support.

Whether your core business is the sugar or the alcohol production, Case IH is always ready to provide you not only with the best cane harvesting technology and dependability, but also with a worldwide network of dealers, parts depots and service workshops, all working together to increase your profitability and assure your peace of mind.

CASE IH ADVANCED SUPPORT

Case IH has an after-sales superstructure with specialized technical assistance and logistics centers for giving support to the client. For a fast and precise customer service experience, dealers and factories exchange technical experiences through Asist, an exclusive program via Internet.

MAINTAIN THE PRODUCTIVITY OF YOUR INVESTMENT

Case IH and its dedicated dealer network provide excellent support when you take delivery of your new machine and whilst it remains in your ownership. On the farm, you can rely on trained service professionals to maintain the productivity of your investment.

DEFEND YOUR WORK, INVESTMENT AND EQUIPMENT. ALWAYS CHOOSE CNH INDUSTRIAL GENUINE PARTS.

Protect the value of your investment. Behind every Case IH product stands an extensive parts logistics organisation, stocking parts for products both old and new. Choosing to fit genuine Case IH parts will maintain the safety, value and performance of your original investment.

| MODEL | AUSTOFT 4000 |
|---------------------------------------|-----------------------------|
| ENGINE | |
| Make | FPT |
| Series | NEF |
| Power (hp/kw) | 168 / 125 |
| Cylinder volume (l) | 6,7 |
| Aspiration | Turbo / Aftercooler |
| TRANSMISSION | |
| Type | Hydrostatic |
| Travel speed (Km/h) | 16 |
| CAPACITY | |
| Fuel tank (l) | 210 |
| Hydraulic oil tank (l) | 130 |
| TYRES | |
| Front | 10.5 x 16 10-ply |
| Rear | 16.9 x 28 R-1 10-ply |
| TOPPER | |
| Height variation (mm) | 1,050 to 3,000 |
| optional extension(mm) | 500 |
| Height adjustment | Hydraulic |
| CROP DIVIDERS | |
| Distance between the points (mm) | 1,100 |
| Spiral angle (°) | 30 |
| Height adjustment | Hydraulic |
| Lower section | Hardened |
| BASECUTTER | |
| Drive | Hydraulic and reversible |
| Number of discs | 2, identical and reversible |
| Number of blades | 8, removable |
| Distance between center of discs (mm) | 495 |
| FEED ROLLERS | |
| Number of rollers | 11 |
| Number of rollers on the roller train | 8 |
| Drive | Hydraulic and reversible |
| Upper rollers | Floating |
| CHOPPER | |
| Number of blades per drum | 3 |
| Deflector plate | Adjustable |
| KNOCKDOWN ROLLER | |
| Height | Adjustable |
| Angle (°) | 51 |
| EXTRACTOR | |
| Number of blades | 4 |
| Maximum speed | 1,500 (+/- 100) rpm |
| Hood | Directional |
| ELEVATOR | |
| Drive | Hydraulic and reversible |
| Slewing angle (°) | 170 |
| Optional extension (mm) | 750 mm |
| Weight (kg) | 8,000 kg |

AUSTOFT 4000 – FACTORY-FITTED ITEMS

| |
|--|
| Air-conditioned cab with 2 doors |
| Windshield wipers |
| 2 Rear view mirrors |
| Dash board lighting |
| Tachometer and hour meter of the engine |
| Fuel level gauge |
| Engine oil pressure indicator |
| Temperature indicators of the hydraulic oil and engine coolant |
| Battery voltage indicator |
| Indicator of hydraulic pressure at base cutter and chopper |
| Safety relays |
| Safety brake |
| Gyroflex |
| Quartz halogen headlights mounted on the cab |
| USB charging port |
| Low engine fuel level warning |
| Traffic lighting |
| Wind Screen protector |
| Elevator cane flap |
