N-GAUGE INSIGHTS

YOUR HARVEST. CONNECTED.

www.caseih.com.au

N-GAUGE Insights connects machines, data, and growers, providing the insights and tools that turn harvest complexity into confidence, efficiency, and better decision-making.

N-GAUGE Insights synchronises your machines, people, and data into one connected operation, giving you complete control over how information is shared. Whether you're working with an agronomist, contractor, or trusted partner, you decide who has access, helping you collaborate with confidence while staying in control of your harvest.

HARVEST DATA AT A GLANCE

CONNECTED HARVEST
MANAGED AND CONTROLLED BY YOU.

CASE IH

N-GAUGE INSIGHTS

FROM HARVEST CHAOS TO HARVEST CONFIDENCE.

MAP VIEW

View yield, moisture, machine performance and if equipped protein and oil data from anywhere.

MACHINE METRICS

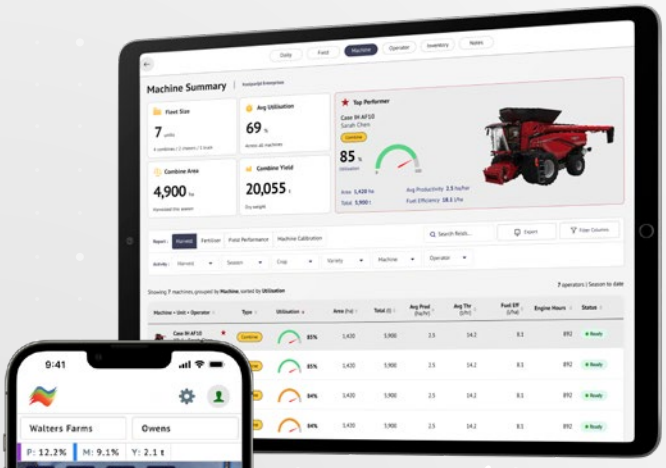

Monitor and track machine performance and productivity giving you a far greater understanding of the machines throughput and performance.

DIGITAL GRAIN STORAGE

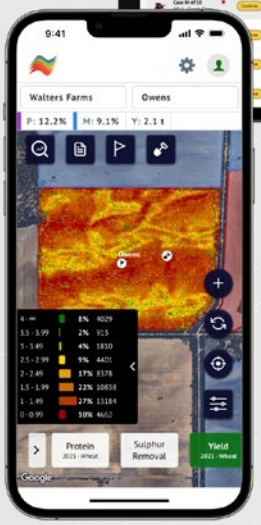

View grain quality and quantity across virtual grain storage locations to improve grain marketing and deliveries.

OPERATOR AID

Maximise your operators performance and manage their workload based on key performance metrics.

N-GAUGE INSIGHTS CAPABILITIES

- Gain complete visibility of harvest performance with real-time insights across every paddock, machine, and operator.
- Track machine productivity and utilisation to identify opportunities to improve efficiency and reduce downtime.
- Monitor operator performance and compare results to drive consistency and maximise harvest outcomes.
- Maintain data accuracy with calibration management, ensuring reliable yield and moisture information throughout harvest.
- Receive daily harvest summaries that provide a clear snapshot of production, progress, and key operational metrics.
- Analyse field and crop performance with yield maps, averages, and season-to-season comparisons.
- Transform harvest data into actionable insights that support faster, more confident decision-making.
- Collaborate securely with trusted advisors and partners while maintaining complete control of your data.
- Generate and share professional reports to keep your team aligned and informed throughout the season.
- Connect machines, people, and data.
