

360°: GENESIS® T8 tractors.

GENESIS® T8 tractors have been designed to spend more time working and less time requiring service. All service points are easy to access, and super-long service intervals mean your tractor will spend more time in its natural environment: the field!

A built-in step makes reaching the front screen for cleaning safe and secure.

Single-piece engine hood opens wide for full-service access.

Cooling package opens out to make cleaning faster and easier.

Engine and hydraulic oil check and fill points are easy to reach, making routine checks fast and servicing simpler.

The engine air filter is easy to check, clean or replace, with no need for tools from ground level.

Fill the windshield wash bottle through the rear window.

Changing the cab air filter is easy.

The fill point for the 26 gal. AdBlue additive tank is located beside the main diesel fill point for convenience, and it only requires top up when filling the fuel tank. Both diesel and AdBlue tank are lockable for added security.
