RAVEN CR12 GUIDANCE KIT

From **R181 000** incl. VAT

Electric steering with CR12, SC1™ & DirecSteer

Mixed fleet solution

A high-performing and brand-independent automated steering system for growers around the world.

Perfect for 4-20 cm accuracy applications, pairs effortlessly with a Raven display and offers easy transfer between machines with its optional magnetic mounting plate.

Maximised productivity

Run your equipment more efficiently to increase productivity and reduce input costs.

The Raven portfolio, independent of brand and flexible in design, supplements the AFS lead product range in the retrofit sector. This synergy expands our ability to cater to diverse customer needs across various machine makes, ensuring tailored solutions for all.

Helping farmers serve the world.
