

# FLEETPRO™

## CATALOGUE 2024

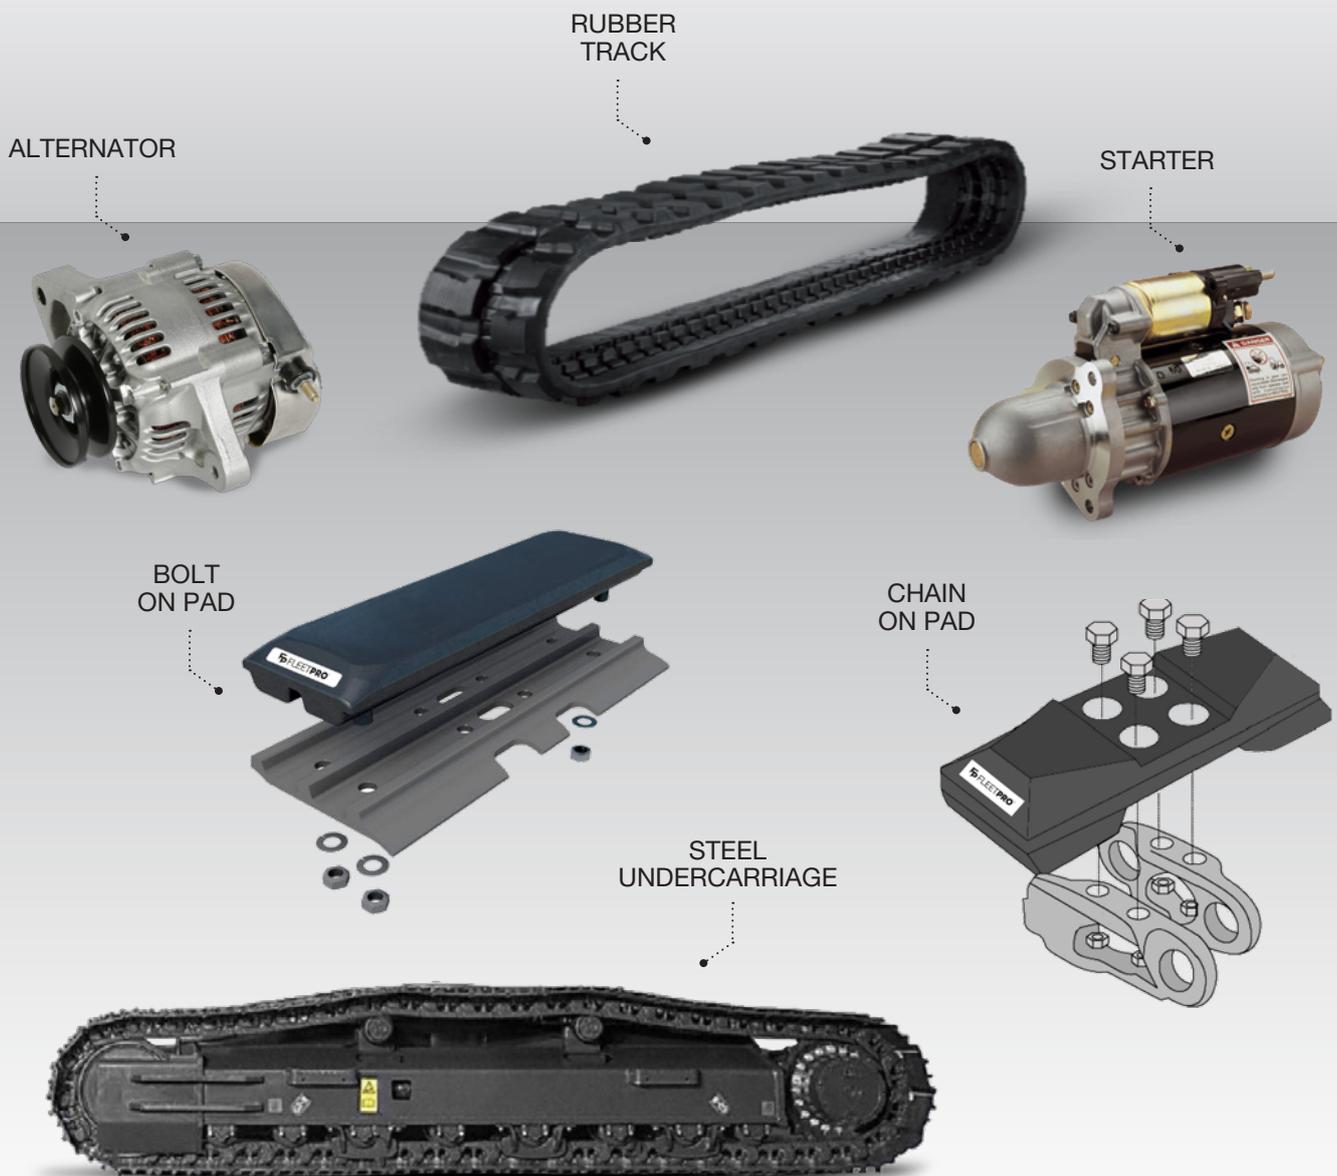

# WHAT IS FLEETPRO?

FleetPro is our second line of spare parts, focused on older machines and compatible with other brands. With FleetPro, we offer you reliable and certified components at competitive prices to breathe new life into your fleet. Quality has never been more affordable: get the best value for your investment with our competitive prices.

## MAIN BENEFITS:

- + CERTIFIED PARTS
- + UNDER CNH WARRANTY
- + COMPETITIVE PRICES
- + HIGH QUALITY

## THE FLEETPRO RANGE

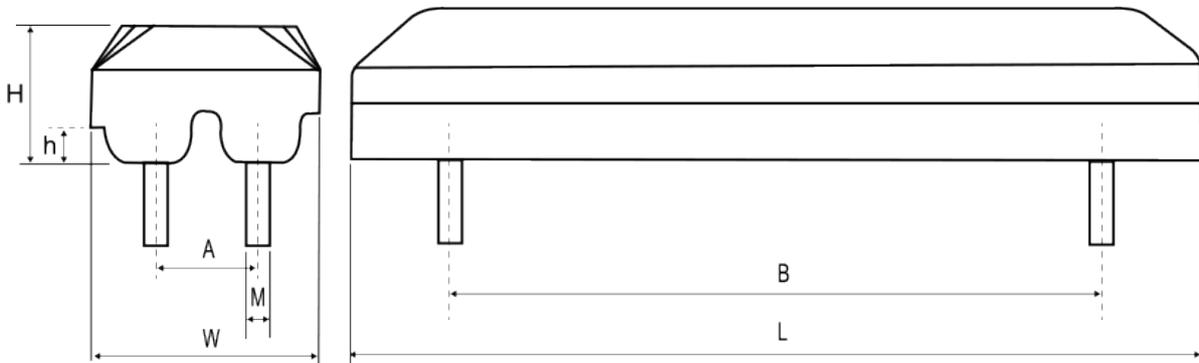

# BOLT ON PADS

The **FLEETPRO bolt on pad** consists of a steel plate surrounded by a robust rubber-blend cushion, which together with the pad's optimized shape helps to reduce wear, as well as vibration and noise. The pads fit perfectly to the track shoe and provides full surface protection.

**Bolt on pads** can be easily removed and replaced providing a cost and a time-effective way of adapting the excavator for different environments.

## Key benefits:

- + Quiet and smoother ride which enhance the operator's experience
- + Superior quality rubber compounds to ensure long-lasting durability
- + Ease of replacement of single units if one of them gets damaged
- + Less noise and vibration when operating the excavator
- + Better traction and less damage to surfaces
- + Ease of removal and replacement, providing a cost and time-effective way for different environments

# CHAIN ON PADS

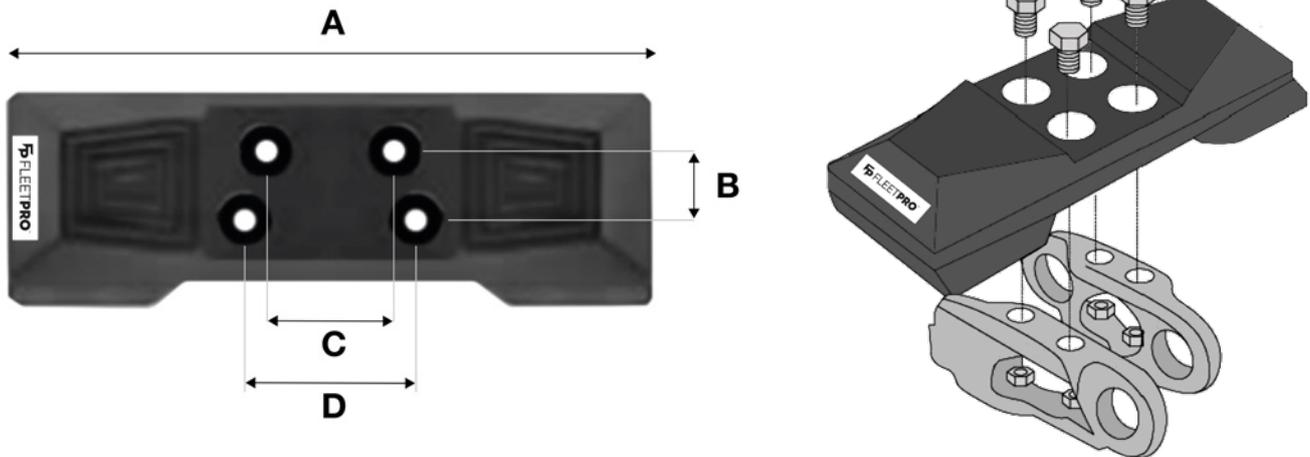

The **FLEETPRO** chain on pads are a good alternative to steel shoes which damage the ground surface and are ideal where rubber tracks are not available.

Furthermore, vibration and noise are reduced compared to steel shoes.

They are easily fitted to the undercarriage of excavators in the same way as conventional steel tracks. The CASE **Chain-On** rubber pads are manufactured using a heavy-duty rubber compound for greater strength and high durability.

## Key benefits:

- + Quiet and smoother ride to enhance the operator's experience.
- + They are made of superior quality rubber compounds to ensure long-lasting durability.
- + Easy replacement of single units is possible if one of them gets damaged.
- + Sand, gravel, rocks or other material are less likely to get in and around the undercarriage thanks to the wings which help to avoid premature damage.

# STEEL UNDERCARRIAGE

**STEEL UNDECARRIAGE** is a value line of undercarriage components\* for Case excavators.

\*Track roller, upper roller, idler, sprocket, track link.

## Key benefits:

- + Product availability (in stock at the warehouse)
- + Improved productivity: quick, easy installation
- + Excellent quality/price ratio
- + Reduced operating costs for customers

# RUBBER TRACKS

The FleetPro rubber track range was developed to supply the fleet of CASE machines in Europe with products offering optimal value for money.

Nevertheless, this range is applicable to many applications of other brands.

Complementary to the factory options, we can also offer different sizes or designs, such as the 300mm wide rubber track for CX26.

This size provides the machine with greater stability, thereby offering more comfort for the operator.

## RUBBER TRACK FOR COMPACT TRACK LOADER

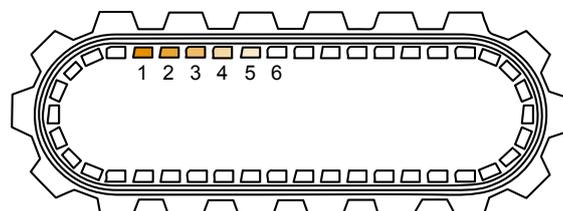

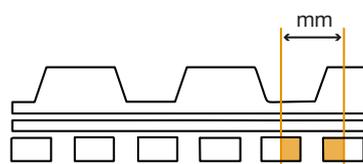

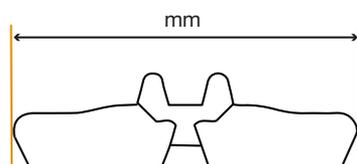

This rubber track PN covers close to 70% of our European CASE applications park.

## RUBBER TRACK FOR MINI EXCAVATOR

RUBBER TRACKS range of 14 FleetPro references covers all our B, C, and some D series of MINI excavators. These 2 new rubber tracks will allow you to upgrade the 2,6t applications (CX26B and CX26C) thanks to a width of 300 mm vs 250mm.
