excl wear items

## MILLS **PROVEN** TO KILL 99%

don't waste power  
making hot air

- **Independently tested** to have a fifth of the survivors of its nearest competitor
- Kill seeds in more conditions: 4 modes of action: **crush + shear + impact + grind**
- **Widest kill range** of 2250-3000rpm
- **Lowest no-load power:** Aerodynamic rotor profiles provide lowest no-load power (25kW)
- **Quick Swap** to High Capacity screens 20 min for green material or tough conditions
- **Eat stones for breakfast** with the mill stone escape doors and flexible flails
- **Tough mills:** tungsten coated heat treated Aussie steel

## EASY ACCESS

- **Minimal downtime:** fastest mill changeout time of 20 minutes
- **Max wear life:** each part can be replaced individually
- **Maximise harvest uptime:** easy access to sieves for removal & maintenance

## HORIZONTAL

everything's better  
horizontal

- **14m Full width spread:** high velocity chaff + air direction ensures nutrient & moisture retention benefit is evenly delivered full width to 14m
- **\$12/ha Chaff fraction value:** nutrient alone + moisture conservation
- **Stable operation + reduced vibration** with individually balanced horizontal mills

## INDEPENDENT BY DESIGN

- **Shock load protection:** Independent mills / gearbox and chassis via belt drive isolates all components and protects your investment if something goes wrong
- **Low speed gearbox:** Custom German Gearbox operates efficiently at a low 1580RPM without the complexity & wasted power of cooling

## PATENTED SAFEGUARDS

- **Cut lower with confidence:** Capture metal off the cleaning shoe via the Magnet Tray using 79 rare earth magnets, each with 9.2kg of pulling force
- **Real-time monitoring:** in cab display of mill speed, bearing + gearbox temperature, wear vibration sensors & blockage sensors

## FUTURE **PROOF** PLATFORM

- Access the **latest in mill tech** designed by the world expert in mechanically killing weed seeds Dr Nick Berry
- **Backwards compatibility:** HWSC is a long term game, new mill technology is made to be compatible with past Seed Terminators
- **Maximise your mill investment:** installation is minimally invasive and designed to enable the farmer to keep and swap to new or second hand combine markets
