GENUINE LIGHTS AND BULBS

MAKE AN ENLIGHTENED CHOICE!

CASE IH MAKES THE DIFFERENCE.
LET'S SEE HOW.

GENUINEPARTS
HIGH PERFORMANCE

CASE IH

The key role of lights and bulbs.

OPTIMUM VISIBILITY IS THE KEY TO BOOSTING **PRODUCTIVITY AT NIGHT** WHILE WORKING IN **COMPLETE SAFETY**.

ADEQUATE LIGHTING IS ESSENTIAL TO **ENSURING EXCELLENT VISIBILITY**.

GENUINE CASE IH LIGHTS AND BULBS GUARANTEE **OPTIMUM LIGHTING AT ALL TIMES**.

AREAS.

INCORRECT

To ensure optimum visibility when working with your headlamps on, your headlamps need to be positioned **correctly** such as to provide an **intense and precise source** of luminous power - this is the only way to guarantee your **comfort and safety** while also taking the stress out of driving.

Why choose Genuine CASE IH lights and bulbs?

BECAUSE WE ARE THE ONLY COMPANY CAPABLE OF ENSURING MAXIMUM QUALITY IN TERMS OF:

PRECISION: Genuine lights can be installed more quickly and with greater precision, as the presence of matching hooks reduces fitting times. Genuine bulbs provide a precise and intense source of luminous power at all times, exhibiting high resistance to sudden changes in voltage and always consuming the correct amount of voltage.

RELIABILITY: Lights that have been approved and guaranteed offer the same standard of quality as the component that was originally installed. Bulbs that have received ECE E1 approval in accordance with EU regulations have been tested specifically to meet the demands of off-road vehicles.

DURABILITY: Genuine lights are guaranteed to last longer as they are made using top-quality raw materials and have a high resistance to vibrations. Their high resistance to vibrations and ability to consume the correct amount of voltage at all times means that Genuine light bulbs last twice as long as regular standard bulbs.

BEACONS – INCREASE YOUR VISIBILITY FOR OTHERS

CASE IH also offers a range of best in class LED beacons for perfect visibility and optimised safety for yourself and others, both on the field and on the road.

LED BEACONS PRODUCT ADVANTAGES

LIGHT INTENSITY

30 % HIGHER THAN EUROPEAN STANDARD

LIGHTING

OPTICAL GROUP WITH 6 LEDS = EXTENDED LIFE TIME

POLYCARBONATE DOME

UNBREAKABLE UNDER NORMAL CONDITIONS OF USE

IMPROVED WEATHERPROOFING

PROTECTION AGAINST DUST AND HUMIDITY STANDARDS

TEST 1 RESISTANCE TEST SHOCK RESISTANCE, UNBREAKABLE DOMES

The polycarbonate dome means the CASE IH beacon dome is virtually unbreakable. Unbranded replacement domes, often made out of polymethacrylate, break frequently and are not very durable.

TEST 2 LIGHT INTENSITY TEST LIGHT INTENSITY: + 30 %

The CASE IH flashing beacon consists of an LED group which ensures optimum distribution of the light beam and high visibility. Tests show that CASE IH beacons give out **30 % more** light than required by European standards.

TEST 3 WEATHERPROOF TEST OPTIMUM PROTECTION AGAINST DUST AND HUMIDITY

The high protection rating (IP65) of CASE IH flashing beacons offers excellent weatherproofing against external elements including dust and water.

Recommendations for use

BE AWARE OF THE RISKS ASSOCIATED WITH USING NON-GENUINE BULBS.

POOR LIGHTING: Poor-quality raw materials illuminate the road and the vehicle neither properly nor sufficiently, thereby compromising road safety and your occupational safety.

MALFUNCTIONING: Non-approved products made using non-certified production processes may have low resistance to the weather, to extremes of temperature and to vibrations, which could cause faults in the vehicle's electrical system.

FREQUENT REPLACEMENT: Non-standard products wear out quickly as they are not fully compatible with the vehicle, thus increasing the risk of a breakdown and forcing you to stop work.
